

POLICE TRAK SYSTEMS

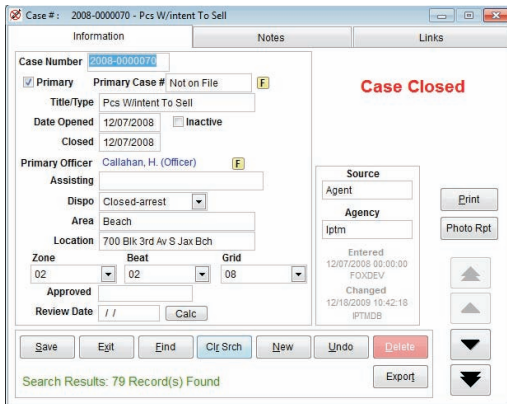

law enforcement software designed by law enforcement

DRUG TRAK Intelligence Records Management Software

Drug Trak is our premiere intelligence and case management system. Over 600 agencies world-wide have used Drug Trak over the past 26 years, making it the most widely used and longest lasting intelligence records management system in existence. Drug Trak was designed to make the task of managing intelligence information easier, streamline the workflow and greatly increase the efficiency of narcotics investigators. No longer just for narcotics units, Drug Trak offers intelligence data gathering and analysis tools for any special investigative unit including gang investigators and school resource officers.

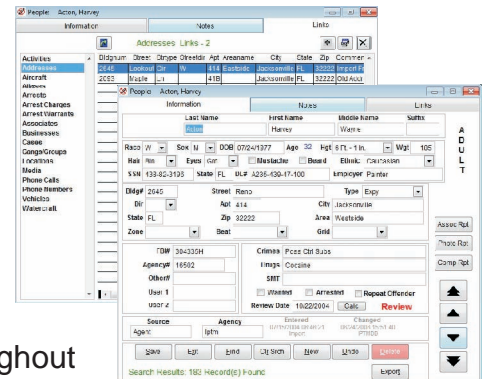

You can create and manage links for unlimited numbers of cases, people, vehicles, locations, businesses, gangs, aircraft, watercraft, phone calls and phone numbers, and much, much more. The system comes with over 150 reports and full color charts designed to provide the investigative unit with critical information and statistical analysis. Case investigations can be logged and tracked from beginning to end in real time, maintaining a chronological order of all facets of the investigation time line.

Key features include:

- Standardized comprehensive reporting system with over 150 built-in reports and full color charts
- Extensive searching capabilities within every field and screen
- Reports and charts are produced based on search criteria
- Unlimited attachments such as pictures, documents, video and audio files linked to any record
- Attachment storage on-line with the data or off-line on CD, DVD and other removable media

- Financial accounting with unlimited accounts and transactions
- Confidential Informants section with full activity tracking and reliability factoring
- Search Warrant section with unlimited evidence and confiscation items linked to warrant service
- Arrest Warrant section with automatic checking within the system for wanted persons
- Configurable alerts for cases, people, evidence/confiscations and informants requiring review
- Complete control over all drop downs, lookups and pick lists throughout the system

Powerful searching and data mining features are integrated within every screen to provide a simple, intuitive means of producing easy to read and comprehensive reports. File attachments of virtually any type, such as pictures, documents, video and audio files, can be linked to any record. Attachments can be stored on-line with the database or off-line on CD, DVD and other removable media.

Case Logs

12/07/2004 1030 Callahan, H. Supplemental
 Notes: Suspect approached this undercover officer with 2 rocks of crack, and said there lots more where this came from. I identified myself as a police officer and place the subject under arrest for PCS
